#### Ethos

To provide experiences that empower students to become

autonomous, competent, and connected adventurers who can have a positive impact on others, their community, and the environment.

#### Overview

Ecoventure programs are designed to be exciting and educational. Students gain increased personal awareness and a great appreciation for the outdoors. This road trip across the top of Oman takes in some of the most stunning scenery the country has to offer, including water-filled wadis, pristine beaches, turtles, and dolphins.

## **Accommodation Facilities**

Accommodation for the road trip includes three nights in different hotels and two nights of camping. Teachers and Ecoventure staff are always nearby to where the young adventurers are sleeping.

## Food

Safety

Meals are a mixture of Omani and Western dishes, with buffet breakfast and dinner. Lunches are packed, so students can enjoy their meal with views of nature. All meat is halal and dietary requirements can be catered for, provided we are advised in advance.

All Ecoventure staff are first aid trained. We work with local partners to ensure we have the most up-to-date local knowledge. Our student to instructor ratios are kept low to ensure safety at all times.

### Personal Impact

Appreciate a diverse array of ecosystems and how humans can impact them.

Personal empowerment through pushing one's comfort zone. Appreciate different cultures and new perspectives.
